Guidelines

Guidelines for Marriage Halls and Marquees Reopening During COVID 19

Objective

To provide guidelines to the public health professionals, event organizers, owner of the of the wedding halls/marquees and general public for the reopening of marriage halls/marquees during COVID 19 epidemic.

Rationale:

Public gathering is a potential risk for the COVID-19 infection and community transmission in the area. The wedding events during COVID 19 epidemic should be organized while taking care of the precautions and SOPs pertaining to gatherings to avoid the chances of spread.

Guiding Principles

The size of wedding event or gathering should be determined based on local safety regulations under the guidance of local public health authorities however following guiding principles are as follows:

Low risk Areas- No to minimal community transmission: (Evidence of isolated cases or limited community transmission; no evidence of exposure in large communal settings) - Moderate to Large in-person gatherings of up to 100 guests, that are adopted to allow individuals to remain spaced at least 6 feet apart.

Moderate Risk Areas-Minimal to moderate community transmission: (Sustained transmission with high likelihood or confirmed exposure within communal settings and potential for rapid increase in cases) Medium-sized in-person wedding gatherings of 50 guests that are adapted to allow individuals to remain spaced at least 6 feet apart.

High risk areas- Substantial, controlled and uncontrolled transmission: (large scale, uncontrolled community transmission, at communal settings) Smaller outdoor and in-person wedding gatherings of less than 25-guests in which individuals from different households remain spaced at least 6 feet apart.

Guidelines for the Wedding Events

General Measures:

- **Employees and attendees to stay at home:** if, tested positive for COVID-19 or suspected with symptoms.
- **Hand Hygiene and Respiratory Etiquette;** during the event wash hands with soap and water for at least 20 seconds and use hand sanitizer that contains at least 60% alcohol.
- **Cloth Face Coverings/Face masks** should be mandatory
- **Social distancing** of 6 feet to be maintained at all places
- **Adequate PPEs and Supplies during wedding Event:** including soap, water, hand sanitizer, paper towels, tissues, disinfectant wipes, cloth face coverings (as feasible), and no-touch trash cans
- **Sign posting and Messages-** Post signs in highly visible locations (e.g., at entrances, in restrooms) that promote everyday protective measures.

Measures Before and During Wedding Event

Recognize sign and symptoms-Thermal screening

- Conduct daily health checks (e.g., temperature screening and/or symptom checking) of staff

- In High risk areas corona testing of staff should be performed after every 2 weeks.
- The Wedding attendees should have a thermal screening at the entrance of the Wedding hall.

Modified Layouts

- Limit attendance or seating capacity (at the most 4 individuals are expected to sit around a standard size table, with 6 feet apart) to allow for social distancing or host smaller wedding events in larger rooms.
- Use multiple entrances and exits and discourage crowded waiting areas.
- Eliminate lines or queues at the entrance and exit doors if possible or encourage people to stay at least 6 feet apart
- Prioritize outdoor activities where social distancing can be maintained as much as possible.

Cleaning and Disinfection

- Clean and disinfect frequently touched surfaces before, during and after the wedding event
- Clean and disinfect event buses, vans, and vehicle

Physical Barriers and Guides

- Provide physical guides, such as tape on floors or sidewalks and signs on walls, to ensure that individuals remain at least 6 feet apart in lines and at other times (e.g., guides for creating one-way routes)
- Install physical barriers, such as sneeze guards and partitions, in areas where it is difficult for individuals to remain at least 6 feet apart.

Communal Spaces

- Stagger use of shared indoor spaces such as dining halls, and lounges as much as possible and clean and disinfect them frequently before and after the use.
- Encourage hand wash and hand sanitization before and after the use of the dining halls.

Food Service

- There is no evidence that COVID-19 is spread by food. However, people sharing utensils and congregating around food service areas can pose a risk.
- If a group dining room is used, serve individually plated meals or grab-and-go options, and hold activities in separate areas.
- Use disposable food service items including utensils and dishes. If disposable items are not feasible or desirable, ensure that all non-disposable food service items are handled with gloves and washed with dish soap and hot water or in a dishwasher.
- Avoid offering any self-serve food or drink options, such as buffets, salad bars, and drink stations. Consider having pre-packaged boxes or bags for each attendee, if not possible the dinner must be served to the individual tables with all standard hygienic measures.
- Individuals should wash their hands after directly handling used food service items.

Restrooms

- Do not allow lines or crowds to form near the restroom without maintaining a distance of at least 6 feet from other people. It may be helpful to post signs or markers to help attendees maintain the appropriate social distance.
- Ensure that restrooms are operational, cleaned and disinfected regularly, particularly high-touch surfaces such as faucets, toilets, stall doors, doorknobs, countertops, diaper changing tables, and light switches

Ventilation

- Ensure ventilation systems operate properly and increase circulation of outdoor air as much as possible for example, by opening windows and doors.

- If portable ventilation equipment like fans are used, take steps to minimize air from them blowing from one person directly at another person to reduce the potential spread of any airborne or aerosolized viruses

Maintaining Healthy Operations

Wedding Event organizers and staff should consider implementing several strategies to maintain healthy operations.

Regulatory Awareness- the marriage hall authorities should be aware of the Federal or Provincial regulatory policies related to group gatherings

Staff and Attendees at Higher Risk of Severe Illness From COVID-19

- As feasible take precautions for staff and attendees at higher risk for severe illness (including older adults and people of any age with underlying medical conditions)
- The wedding attendees from other countries should follow the standered guidelines for the travelers before attending the ceremony.

Designated COVID-19 Point of Contact

- Designate an administrator or manger to be responsible for responding to COVID-19 concerns and contact and collaborate with the local health authorities as needed
- The designated point of contact to keep abreast of local “sentinel” testing protocols and coordinate with public health authorities for this purpose.

Communication Systems

Put systems in place to:

- Encourage staff and attendees to self-report to event officials or a COVID-19 point of contact if they have symptoms of COVID-19, a positive test for COVID-19, or were exposed to someone with COVID-19 within the last 14 days
- Advise attendees prior to the event that they should not attend if they have symptoms of, a positive test for, or were recently exposed (within 14 days) to COVID-19.

Staff Training

- Train staff on all safety protocols related to covid.
- Recognize Signs and Symptoms

Measures after the Wedding Event

- Develop a schedule for increased, routine cleaning and disinfection after the wedding event.
- Dispose of all the waste including used masks, gloves and others in a safe manner.

Note: The above recommendations are being regularly reviewed by the Ministry of National Health Services, Regulations & Coordination and will be updated based on the international recommendations and best practices.

The Ministry acknowledges the contribution of Dr. Urooj Aqeel and HSA/ HPSIU/ NIH team to compile these guidelines
